NEW LIFE – SAVING THE ENVIRONMENT

# WHAT IS HEADLIGHT RESTORATION

New headlights have a factory applied protective coating that protects the lens from oxidation. In time heat, UV, dust, pollution and car wash chemicals wear away the original protective coating and cause the headlight to cloud up.

Headlight restoration by New Life brings back the original clarity and shine by refinishing the headlight's surface and replace the protective coating.

## Benefits

**Safety:** clear headlights project further;

**Save money:** why replace when restoration is a fraction of the cost;

**Looks great:** bring back the sparkle and improve resale value;

**Eco-Friendly:** no old headlights to dispose of;

**Reliability:** OE protective finish means durability and long life without continuous attention;

**Professional Technicians:** we know what we are doing and can guarantee the best possible results.
